The *Journal of Computational Chemistry* is published quarterly, one volume per year, by John Wiley & Sons.

The journal publishes articles concerned with all aspects of computational chemistry: organic, inorganic, physical, or biological. Other work, such as experimental or theoretical work, may be reported provided the emphasis is computational in nature.

Only work of recognized scientific quality is accepted for publication, and papers are refereed to insure that such standards are met. In general, the computations are at or near the "state of the art" limit available for the particular work at hand. Thus for studies on molecules containing only a few first row atoms, calculations approaching the Hartree-Fock limit, or perhaps even post-Hartree-Fock calculations, are expected. For larger molecules, where such detailed calculations are prohibitively expensive, or for studies involving reaction surfaces, for example, semi-empirical methods such as MINDO/3 would be appropriate.

Molecular mechanics calculations would be the method of choice for many molecular problems for which the necessary empirical data exist.

Statistical mechanics calculations, Monte Carlo calculations, computer assisted organic synthesis, and most other kinds of chemical calculations are also suitable topics.

Subscription price (1982): $70.00 per volume. Postage and handling outside U.S.A.: $10.00 by surface; $46.00 by air. Please allow four to six weeks for processing a change of address.

Claims for undelivered copies must be made no later than three months following month of publication. Missing copies will be supplied when loses have been sustained in transit and where reserve stocks permit.

Back numbers, microfilm, and microfiche are available; request a price list from the publisher.

Journal of Computational Chemistry

Contents Volume 2 1982

Number 1 Spring 1981

The Origins of Barriers to Orbital Symmetry/Topology-Allowed Pericyclic Reactions: Conjugate Addition of Methylene to *s-cis*-1,3-Butadiene
N. L. Bauld and D. Wirth 1

Ab Initio Studies of RO^- ... HOR′ Complexes. Solvent Effects on the Relative Acidities of Water and Methanol
W. L. Jorgensen and M. Ibrahim 7

CN Stretching Frequencies in Amide Systems
H. S. Randhawa and J. L. Kapoor 12

Studies in Hydrogen Bonding: Association in Methanol Using an Empirical Potential
G. Brink and L. Glasser 14

Conformational Preferences of 34 Valence Electron A_2X_4 Molecules: An *Ab Initio* Study of B_2F_4, B_2Cl_4, N_2O_4, and $C_2O_4^{2-}$
T. Clark and P. von Ragué Schleyer 20

An *Ab Initio* Study of the Influence of Substituents and Intramolecular Hydrogen Bonding on the Carbonyl Bond Length and Stretching Force Constant. I. Monosubstituted Carbonyl Compounds
C. W. Bock, M. Trachtman, and P. George 30

SCF-$X\alpha$-SW Calculation on the Molecule N_2 Using Theoretical α_{ta}
T. J. Tseng and M. A. Whitehead 38

Cavity Boundary Effects within the Onsager Theory for Dielectrics
S. Ehrenson 41

The Electrical Nature of C—H Bonds and its Relationship to Infrared Intensities
K. B. Wiberg and J. J. Wendoloski 53

Simple Calculation of Electrostatic Isopotential Maps from Bond Fragments
G. Náray-Szabó, A. Grofcsik, K. Kósa, M. Kubinyi, and A. Martin 58

On the Applicability of the MINDO/3 Method in Studies of Molecular Structures in the Vapor Phase. Geometries, Conformational Energies, and Vibrational Amplitudes of Alkenes and Chloroalkanes
D. Van Hemelrijk, W. Versichel, C. Van Alsenoy, and H. J. Geise 63

Electron Density Redistribution in the Stabilization of a Molecular Stacking Complex: The Nature and Correction of Basis Set Superposition Errors
R. Osman, S. Topiol, and H. Weinstein 73

On the Possibility of Improving the Integral Evaluation Section in *Ab Initio* Hartree–Fock Calculations on Large Molecules
G. Karlström 83

Molecular Potential, Cation Binding, and Hydration Properties of the Carboxylate Anion. *Ab Initio* Studies with an Extended Polarized Basis Set
H. Berthod and A. Pullman 87

A Systematic Preparation of New Contracted Gaussian-Type Orbital Sets. IV. The Effect of Additional 3*s* Functions Introduced by the Use of the Six-Membered 3*d* GTOs
H. Tatewaki, Y. Sakai, and S. Huzinaga 96

A Systematic Preparation of New Contracted Gaussian-Type Orbital Sets. V. From Na Through Ca
Y. Sakai, H. Tatewaki, and S. Huzinaga 100

A Systematic Preparation of New Contracted Gaussian-Type Orbital Sets. VI. *Ab Initio* Calculation on Molecules Containing Na Through Cl
Y. Sakai, H. Tatewaki, and S. Huzinaga 108

Number 2 Summer 1981

Isomer Discrimination by Topological Information Approach
D. Bonchev, Ov. Mekenyan, and N. Trinajstić 127

Geometry and Energy of Tetra-*tert*-Butylethylene
G. Favini, M. Simonetta, and R. Todeschini 149

Calculation of Partition Coefficients by the Charge Density Method
G. Klopman and L. D. Iroff 157

The Conformation of Alkyl Sulfoxides
J. C. Tai 161

Parallel Processing on Minicomputers: A Powerful Tool for Quantum Chemistry
R. Seeger 168

Studies in Hydrogen Bonding: Association in Ammonia Using an Empirical Potential
G. Brink and L. Glasser 177

A Comparison of Selected Force Constants Derived from *Ab Initio* SCF Calculations on β-Hydroxyacrolein. Acrolein, Performic Acid, and Formic Acid
C. W. Bock, M. Trachtman, and P. George 182

Molecular Orbital Theory of the Hydrogen Bond. 24. Ground-State Water–Uracil Complexes
J. E. Del Bene 188

Molecular Orbital Theory of the Hydrogen Bond. 25. Water–Uracil Complexes in Excited $n \rightarrow \pi^*$ States
J. E. Del Bene 200

Bicyclo[1.1.0]butadiene (Trialene): An Experimentally Viable Molecule?
J. G. Andrade, J. Chandrasekhar, and P. v. R. Schleyer 207

Minimal Basis Study of Inner-Shell Ionization Potentials for Molecules Containing Sulfur: S,S-Diphenyl-*N*-*p*-Tolylsulfonyl-Sulfilimine

Information for Contributors 219

Number 3 Fall 1981

Determination of Electrical Double-Layer Parameters for the Adsorption of Neutral Molecules at the Electrode–Solution Interface
A. Batana, R. C. Rocha Filho, L. A. Avaca, and E. R. González 221

Ab Initio MO Calculations for the Oxides, Oxyacids, and Oxyanions of S(IV) and S(VI)
N. C. Baird and K. F. Taylor 225

A Computerized Structure–Activity Correlation Program for Relating Bacterial Mutagenesis Activity to Chemical Structure
J. F. Tinker 231

Ab Initio Calculation of Spin–Orbit Interaction in Polyatomic Molecules Using Gaussian-Type Wavefunctions
J. Breulet 244

Ab Initio Study of 4-Monosubstituted Pyrimidines in Ground and Excited $n \rightarrow \pi^*$ States
J. E. Del Bene 251

Three Electron Bonds. I. The $H_2SSH_2^+$ Radical Cation
T. Clark 261

Recent Computational Developments with the Self-Consistent Electron Pairs Method and Application to the Stability of Glycine Conformers
C. E. Dykstra, R. A. Chiles, and M. D. Garrett 266

A Semianalytic Method for Computing the Concentration Distribution in Enzyme–Substrate Fast Reaction Systems
Li Tse-Tsai, Shi Zheng-Wen, Zhou Guo-Qiang, and Chou Kuo-Chen .. 273

A Systematic Preparation of New Contracted Gaussian-Type Orbital Sets. VII. MINI-3, MINI-4, MIDI-3, and MIDI-4 Sets for Transition Metal Atoms
H. Tatewaki, Y. Sakai, and S. Huzinaga 278

AMBER: Assisted Model Building with Energy Refinement. A General Program for Modeling Molecules and Their Interactions
P. K. Weiner and P. A. Kollman 287

Representation of the Molecular Electrostatic Potential by a Net Atomic Charge Model
S. R. Cox and D. E. Williams 304

Force Field and Self-Consistent Field Calculations on a Trans Coplanar Disulfide: Bis(2-Pyrimidyl)disulfide
D. B. Boyd and K. B. Lipkowitz 324

A Reassessment of Some Restricted Hartree–Fock Limit Molecular Energies and an Investigation of the Applicability of Ermler and Kern's Procedure for their Estimation
P. George, M. Trachtman, and C. W. Bock 334

Semiempirical Spin–Orbit Coupling Calculations. I. Theory and Method. Benzophenone as a Test Case
R. Pasternak and G. Wagnière 350

Carbodications. I. The Structures and Energies of $C_4H_4^{2+}$ Isomers
J. Chandrasekhar, P. v. R. Schleyer, and K. Krogh-Jespersen 356

Information for Contributors 361

Number 4 Winter 1981

An *Ab Initio* Study of the Guanidinium Fragments in Tetrodotoxin and Saxitoxin
A. M. Sapse and A. Santoro 363

Model for Diffusion-Limited Electrochemiluminescence
D. L. Akins and A. D. Snider 368

On Efficient Integration Techniques for Oscillatory Integrals in Periodic System Calculations
W. J. Schneider and J. J. Ladik 376

Molecular Mechanics of Organic Halides. V. Conformational Equilibria in Solution
A. Y. Meyer 384

The Electronic Structure, Spectra, and Reactivity of Nitrophenols
K. P. Krishnan Namboodiri, S. Viswanathan, R. Ganesan, and V. C. Jyothi Bhasu 392

Monte Carlo Simulation for Inhomogeneous Chemical Kinetics: Application to the Belousov–Zhabotinskii Reaction
F. Zaera and I. Rusinek 402

Ab Initio Studies of Structural Features not Easily Amenable to Experiment. 18. Conformational Analysis and Molecular Structure of Glycine Methyl Ester

L. Schaëfer, C. Van Alsenoy, J. N. Scarsdale, V. J. Klimkowski, and J. D. Ewbank 410

Li^+—F^- in Aqueous Solution
C. W. David and E. E. David 414

Molecular Orbital Theory of the Hydrogen Bond. 26. The Hydration of Uracil
J. E. Del Bene 416

Molecular Orbital Theory of the Hydrogen Bond. 27. Substituent Effects in Water:4-R-Pyrimidine Complexes
J. E. Del Bene 422

MNDO Calculations for Compounds Containing Aluminum and Boron
L. P. Davis, R. M. Guidry, J. R. Williams, M. J. S. Dewar, and H. S. Rzepa 433

On the Construction of Self-Avoiding Chains
V. Mom 446

Conformational Energy Calculation on the Neurotensin C-Terminal Pentapeptide Arg-Pro-Tyr-Ile-Leu OH
M. Cotrait and M. Ptak 460

A Theoretical Approach to Substituent Effects. A Comparison of the Isoelectric BH_3^-, CH_3, and NH_3^+ Groups and Their Interaction with Substituents in Disubstituted Benzenes
G. Kemister, A. Pross, L. Radom, and R. W. Taft 470

Space Modification: An Alternative Approach to Chemistry Problems Involving Geometry
G. L. Silver 478
